Recommendations

1. Health and dignified life

Promote the health and sexual and reproductive rights of all people, especially girls and women, in all their diversity, based on scientific evidence and in accordance with national legislation and international commitments assumed by Brazil, such as the Platforms for Action from Beijing and Cairo;

2. Gender non-discrimination equality

Inclusion of LGBTQIA+ agendas in the Legislative and Judiciary Powers, to stop hate crimes and discrimination

3. Education, austerity and discrimination

Restore massive public funding in public education, diagnose the causes of non-implementation of the National Education Plan and rebuild the institutional spaces that are currently extinct and were responsible for the construction of educational policies on human rights, namely, anti-racist, anti-sexist and anti-LGBTphobic.
